Open Orders Report: Size Class Master List

Printed copy of `size-class-master.xlsx`, sheet "Size Class"

29 models. The macro reads this workbook as Config `SizeClassFile`: MODEL_GROUP is matched to Machine (exact name, then the first word of the name); a model not on the list is UNMAPPED. 3 rows are marked **REVIEW:**: the owner confirms them. Rows, figures and classes are transcribed from the owner's Bobcat Equipment Size Class sheet (photo, 2026-10-15); only the class spellings <2000 and 3500 & Over are written the macro's way. HP is information only.

1. Compact track loaders (CTL)

Classes by rated operating capacity (ROC) in lb: 0<2000, 2000<2300, 2300<2600, 2600<3000, 3000<3500, 3500&Over. The macro reads each model's class from this list; the ROC column is the owner's reference and is not read by the macro.

Table 1. Track loaders, 11 models.

Machine	Size Class	ROC (lb)	HP	Notes
T450	0<2000	1,490	55	class written 0<2000 (sheet: <2000)
T550	0<2000			class written 0<2000 (sheet: <2000); **REVIEW:** HP and ROC blank on the sheet
T595	2000<2300	2,200	70	as on the sheet
T62	2000<2300			**REVIEW:** HP and ROC blank on the sheet
T64-2	2300<2600	2,300	68	as on the sheet
T66-2	2300<2600	2,450	74	as on the sheet
T650	2300<2600	2,570	74	as on the sheet
T76-2	2600<3000	2,900	74	as on the sheet
T740	3000<3500		74	**REVIEW:** ROC blank on the sheet
T770	3000<3500	3,475	92	as on the sheet
T86-2	3500&Over	3,800	105	class written 3500&Over (sheet: 3500 & Over)

2. Skid-steer loaders (SSL)

The frame classes EX Small, Small Frame, Med Frame and Large Frame are the four SSL classes the macro reads from this list.

Table 2. Skid-steer loaders, 9 models.

Machine	Size Class	ROC (lb)	HP	Notes
S70	EX Small	760	23.5	as on the sheet
S450	Small Frame	1,370	49	as on the sheet
S590	Med Frame	2,000	68	as on the sheet
S64-2	Med Frame	2,300	68	as on the sheet
S650	Med Frame	2,690	74	as on the sheet
S66-2	Med Frame	2,400	74	as on the sheet
S76-2	Med Frame	2,900	74	as on the sheet
S770	Large Frame	3,350	92	as on the sheet
S86-2	Large Frame	3,500	105	as on the sheet

3. Mini excavators (MX)

Classes by nominal tonnes: >00-01, >01-02, >02-03, >03-04, >04-05, >05-06, >06-10. The macro reads each model's class from this list; a model missing from it is UNMAPPED until it is added. The figure column holds the operating weight in lb (the file's Rated Operating Capacity column); it is information only.

Table 3. Mini excavators, 9 models.

Machine	Size Class	Weight (lb)	HP	Notes
E10	>00-01	2,593	10.2	as on the sheet

Machine	Size Class	Weight (lb)	HP	Notes
E17	>01-02	3,774	15	as on the sheet
E20	>01-02	4,167	15	as on the sheet
E26	>02-03	6,489	24.8	as on the sheet
E32	>03-04	7,403	24.8	as on the sheet
E35	>03-04	7,659	24.8	as on the sheet
E38	>03-04	7,893	33.2	as on the sheet
E40	>04-05	9,180	40.4	as on the sheet
E48	>04-05	9,830	42.6	as on the sheet
